We deal with information technologies. And we have experience doing it.

Erigo. Latin. Means "to erect, to build".

We specialize in the organization of your information to optimize its management, its re-use and of course its presentation.

We prepare your information into content to educate or simply inform your audience.

We gather information and build content from scratch, or build upon your existing materials.

We specialize in multimedia delivery: cd-rom and web.

We use the best professionals tools, and for increased efficiency, have developed our own custom tools such as Hyper-B and e-lister.

We complete your project in a "turn-key" fashion, or work in collaboration with your ressources and other suppliers.

We are fluent in both English and French.

And last but not least, we offer you over a decade of experience.
